

SARATH GOPAL G

SDE II — Paypal

📍 Chennai | ✉ sarathgopal33@gmail.com | ☎ +91-9597351310 | 🔗 LinkedIn | 📄 LeetCode

Professional Summary

Backend Java Developer with 4 years of experience designing scalable microservices and distributed systems using **Java, Spring Boot, Kafka, RDBMS, and AWS**. Experienced in **Payments, Healthcare, and Data Replication** domains with strong expertise in RESTful APIs, event-driven systems, and high-performance backend applications.

Technical Skills

Languages:	Java 21, Core Java, SQL, JavaScript
Frameworks:	Spring Boot 3.x, Spring Security, Spring Data JPA, Hibernate, Microservices
Security:	JWT, Spring Security (JWT-based Auth), OAuth 2.0
Messaging:	Apache Kafka, AWS SQS (event publishing & consuming)
APIs & Arch:	RESTful APIs, Distributed Systems, OOP, SOLID Principles, Event-Driven Architecture
Databases:	MySQL, Oracle, MSSQL, Postgres
DevOps & Tools:	Git, Gradle, Maven, CI/CD Pipelines, JIRA, DataDog
IDE & Others:	IntelliJ IDEA, Postman, Eclipse, VS Code, DBEaver, SQL
Frontend :	React.Js

Professional Experience

Paypal Mar 2025 – Present

Risk Solutions

- Led the end-to-end implementation of the **Top 50 Merchant restriction program**, collaborating closely with cross-functional teams..
- Resolved **latency issues and addressed database depletion** in the Dormant Account restriction program.
- Identified and resolved a **race condition** in concurrent limitation lifecycle API calls that blocked account holder access.
- Implemented an efficient retry mechanism in an **ActiveMQ** consumer interacting with multiple downstream services, handling traffic exceeding **100k requests/hour**.

AthenaHealth Apr 2024 – Feb 2025

Abbyy - PHI OCR

- Developed the DigitalScribe service to enhance OCR interactions, implementing a fail-safe mechanism using **AWS SQS and Spring Batch**.
- Implemented rate limiting based on ClientID using **AWS API Gateway**, along with vendor-specific data retrieval using **Spring JPA**.
- Configured **load balancing** in Spring Boot for an internal regression testing tool to handle high-volume legacy API traffic.
- Developed multiple UI pages for an internal regression testing tool using **React.js**.

Striim Jun 2022 – Mar 2024

CDC Adapter - RDBMS

- Developed an end-to-end CDC service for capturing real-time data from **Sybase databases, supporting a \$41K annual client contract with Fidelity Investments**.
- Designed an internal framework for database entity name handling, reducing component overhead and **resolving 70% of existing production issues**.
- Handled **1GB transaction scenario** in capturing data from Postgres and reduced the **lag from 10 to 2 minutes**.
- Resolved multiple post-release performance degradation issues using **heap dump and memory analysis**.

Key Achievements

- **Automated fund block/release operations** using IBM ODM rule framework, reducing effort equivalent reducing manual effort equivalent to 8 full-time resources.
- **Resolved 30+ critical customer during Production Support escalations involving authentication failures, data loss, and deadlock issues** providing immediate production fixes.
- Optimized **Oracle GoldenGate Adapter** performance, increasing CDC data processing throughput from **10k/sec to 35k/sec**.

Education

Sri Krishna College of Engineering and Technology, Coimbatore Aug 2018 – May 2022

Bachelor of Engineering (B.E.) in Computer Science and Engineering - 8.64 CGPA
